

LOW - VOLTAGE HEADS

Burk Head LED T20

DESCRIPTION

The Burk display head by Tech Lighting combines design simplicity with practical technology. Inspired by telephoto camera lens this simple display head houses a powerful LED source harnessed by field changeable optics for the most precise beam control. The Burk head is highly customizable featuring a plethora of finishes, beam spreads, lamping and stem lengths. Further customize the Burk head by combining it with any complementary Tech Lighting free-jack or rail system. This low-voltage display head is ideal for commercial lighting applications such as retail stores, libraries and galleries. The Burk ships with your choice of 20° or 35° field changeable optics or integrated lens holders (both sold separately). Includes field replaceable 12 watt, 737.1 delivered lumen, 2700K, 3000K or 3500K field replaceable LED module. Dimmable with most LED compatible ELV or Triac dimmers. Choice of 20° or 35° field changeable optics. Integrated lens holder accommodates up to two MR16 sized lenses or louvers (sold separately). As a general rule when using the Burk head, we do not recommend using greater than 33% of the maximum wattage specified for the low voltage transformer due to inrush current requirements. For assistance in calculations, please contact Technical Support.

INSTALLATION

Socket terminates with FreeJack male connector, which may be installed into a system connector. Elements ordered with a system prefix include a connector for that system. For use on T-TRAK, order FreeJack version and T-TRAK FreeJack Connector (sold separately).

ACCESSORIES & OPTICAL CONTROLS

Eggcrate Louver

antique bronze / antique bronze

black / satin nickel

satin nickel / satin nickel

white / satin nickel
