

LOW - VOLTAGE HEADS

Spot Head

DESCRIPTION

The Spot display head by Tech Lighting is simple in design but extremely functional. The Spot provides light where you need it the most with its 360° rotating head and 260° pivot. The integrated LED lamping is neatly concealed within the head of the lamp and can be glare free when paired with any Tech Lighting glare-reducing lens shield (sold separately). This customizable display head features a contemporary satin nickel hardware finish and four distinct stem lengths. Enhance your space all the more by combining the Spot display head with a Tech Lighting free-jack or rail system. This low-voltage display head is ideal for commercial lighting applications such as retail stores, libraries and galleries. Can hold one lens or louver (sold separately). Low-voltage, MR16 lamp of up to 50 watts (not included). Works with SORAA.

INSTALLATION

Socket terminates with FreeJack male connector, which may be installed into a system connector. Elements ordered with a system prefix include a connector for that system.

ACCESSORIES & OPTICAL CONTROLS

Dichroic Lens, Eggcrate Louver

WEIGHT

0.84lb / 0.38kg ±
